Amytis Bio-Washing Care, 5l

Art.-Nr. 961

Amytis concentrated laundry detergent is specially formulated for all textiles made from natural protein fibres, such as wool, silk, angora, llama hair, mohair, cashmere, washable down and sports &/ functional textiles. Amytis naturally cleans and cares for fabric, colour and skin, making it especially suitable for hand washing. It restores the elasticity of wool, softens silk and leaves other textiles smooth and gentle on the skin. Amytis concentrated detergent is pH-neutral, does not dry out the skin and rinses clean without leaving behind any irritating residues. Amytis concentrated detergent is made from natural proteins and plant oils. It is phosphate free, does not contain any brighteners, stain removers or an added laundry perfume and is readily biologically degradable according to the modified OECD Screening Test. Amytis is a natural product and contains only non-aggressive, formaldehyde-free preservatives to ensure maximum storage life and hygiene. Amytis is very economical with 0,5 litre sufficient for 30 machine washes.

Application note: Suitable for hand and machine washing up to 40 degrees.

Yield: approx. 30 machine washes.

Dosage for machine wash (all hardness ranges): 15 ml.

Dosage for hand wash: 6 ml for 5 l water. Use lukewarm water if possible and rinse thoroughly with clean water.

Dosage cap content: approx. 40 ml.

For further information on the ingredients visit <https://ec.europa.eu/growth/tools-databases/cosing/>

Packaging: Resource-saving 5 litre canister made of PE, with cap made of PP. For optimal recycling, separate canister and cap and dispose of them in recycling waste.

Ingredients (INCI): Aqua (Water), Potassium Cocoyl Hydrolyzed Collagen, Sodium Chloride, Cymbopogon Winterianus Herb Oil, Phenoxyethanol, Geraniol
