

## Press release

Leinfelden, Germany, March 2021

### **Speick Thermal Sensitiv Micellar Water with moisturising organic aloe vera gel rated “very good” by ÖKO-TEST**

For the March 2021 issue of ÖKO-TEST, the German magazine took a closer look at 25 different natural and conventional micellar water products with regard to the surfactants and ingredients used. Nineteen products were rated “very good”. Of these, nine were from the natural cosmetics segment, including the Speick Thermal Sensitiv Micellar Water.

#### **The products were tested for harmful and controversial ingredients**

Testers paid special attention to harmful and controversial substances such as organohalogen compounds, formaldehyde/formaldehyde separators and problematic, allergenic fragrances. It was also tested whether the products contained harmful preservatives, PEG/PEG derivatives or synthetic polymers.

#### **The function of micelles and micellar water**

Generally speaking, micelle technology is nothing new, explain the test editors: “Micelles are formed from surfactants as soon as they exceed a certain concentration in water. This has always been the case.” What is new, however, is their use as a cosmetic make-up remover without the need to rinse with clear water afterwards. This makes micellar water so popular while travelling. Compared to other face cleansers such as standard cleansing foam, micellar water contains much fewer cleaning agents: “While standard face cleansing foam often comprises ten percent cleaning agents, for instance, micellar water contains only one to two percent,” the test laboratory explains.

## **Especially gentle: Speick Thermal Sensitiv Micellar Water**

The formula of the Speick Thermal Sensitiv Micellar Water does not contain alcohol and is therefore especially gentle on the skin. Even so, it thoroughly removes water-soluble make-up and mascara. Its gentle properties and fine, fruity fragrance cleanses and moisturises the skin. The Speick Thermal Sensitiv series is characterised by the use of thermal water from the Schlangenbad spa mineral springs, rich in silicic acid. Moisturising, organic aloe vera gel, soothing reed extract and concentrated algae extract support the regulation of the skin balance. Like every Speick product, the Speick Thermal Sensitiv Micellar Water also contains the unique extract of the organic high alpine Speick plant from biologically regulated wild harvesting.

For optimal recycling, the bottle and cap can be separated and recycled separately.

### **Product details at a glance:**

Speick Thermal Sensitiv Micellar Water, 200 ml. Rated “very good” in the March 2021 edition of ÖKO-TEST.

Certified natural cosmetics (COSMOS): Free from synthetic fragrances, colours, mineral oils, silicones or parabens. Gluten and lactose free. 99.99% natural origin of total. Dermatologically and allergologically tested.

Speick Thermal Sensitiv Micellar Water is available at [www.speickshop.de/en](http://www.speickshop.de/en) or in various well-stocked chemists, plus organic and natural cosmetic specialist stores.
