

## Press release

Leinfelden, Germany, March 2020

### **Very good care for men's sensitive skin – Speick Men Intensive Cream is awarded the best rating by ÖKO-TEST**

For the current March 2020 edition of ÖKO-TEST, the magazine's editors carefully examined 20 conventional and natural cosmetic face creams for men. They tested to see whether the products contain problematic preservatives, allergenic fragrances or other harmful substances that are a cause for concern when it comes to men's facial care for irritated or sensitive skin. And the test result for Speick Men Intensive Cream? Very good!

### **Optimal care for men's skincare requirements**

Although men's facial skin is usually thicker and oilier than that of women in the same age group, shaving and abrasive shirt collars often make it more irritated and sensitive. The revitalising, regenerative effects of Speick Men Intensive Cream provide relief from such issues. Specially developed for men's sensitive facial skin, the cream contains organic shea butter, organic rosemary extract and organic aloe vera gel from biologically regulated cultivation. These ingredients provide the skin with maximum hydration and extra protection against damaging environmental influences. The formula is enriched with the unique extract of the high alpine Speick plant from biologically regulated wild harvesting.

### **Sun care is the best anti-ageing protection**

In conclusion, ÖKO-TEST recommends that all men use sun protection, regardless of how extensive – or limited – their facial skincare regime is. Especially between April and September, and particularly in the mountains and on the water, men's skin needs adequate protection against UV radiation. Our recommendation: the 100% natural and mineral sun care products from Speick SUN with SPF 20, SPF 30 and SPF 50+.

They ensure reliable protection from UVA and UVB rays without the use of harmful ingredients.

**Product details at a glance:**
